

**Postdoctoral Position: Division of Biostatistics, Department of Population Health,
NYU Grossman School of Medicine, New York University**

Company information: NYU Langone Health is one of the world's preeminent academic medical centers and one of the nation's premier centers of excellence in health care, biomedical research, and medical education. The Department of Population Health in the NYU School of Medicine was founded in 2012, and consists of core areas of biostatistics, epidemiology, healthful behavior change, comparative effectiveness and decision science, behavioral economics and health policy, and medical ethics.

Duties and Responsibilities: The postdoctoral fellow will engage in both methodology development and applied collaborative research in causal inference. Topics of interest include semi-/non-parametric Bayesian methods; Bayesian causal inference for policy evaluation; causal methods for time varying exposure and interference; and modern quasi-experimental methods. The fellow will have opportunities in pursuing independent funding.

Position Qualifications: Applicant should have a Ph.D. or equivalent in Statistics, Computer Science, Biostatistics, Bioinformatics, Data Science, or other quantitative areas. Strong statistical knowledge and computational skills (being proficient in R and/or Python) are required. A successful candidate should have excellent oral and written communication skills, track record of peer reviewed publications, and strong motivation and dependability.

Salary Range: The salary range for this position is \$70,000 to \$75,000 per year and will depend on qualification and experience of the candidate.

Benefits: Details on postdoc benefits at NYU Langone Health can be found [here](#).

Contact: Send the application with a cover letter detailing research interests and career goals, a curriculum vitae, and contact information for three references to samrachana.adhikari@nyulangone.org.

Application deadline: Open until filled. The position is available immediately and for up to two years.
